

MY BOOM AF – Air Inflatable Containment boom

- **My-Boom AF** is a lightweight rapid response boom - ideal for operations in coastal waters and harbours
- **My-Boom AF** is made of a highly flexible material and has good wave following characteristics. It is available with one air chamber/section or 4 m long segmented air chambers
- **My-Boom** has non-return Monsun type air filling and emptying valves. End connectors are ASTM type with a choice of slide or quick connectors.
- **My-Boom** is made of orange coloured 1000 g/sqm PVC coated polyester with a hot dip galvanized grade 30 chain as tension member and ballast weight.
- **Effective, reliable design**
- The **MY-BOOM AF** range of booms provides simple and effective containment boom solution. It is designed for optimum performance, quick deployment from a reel and low storage volume. For operation of the reel and inflation a range of power packs is available

My-Boom is available in two standard sizes: 0.6 and 0.75 meter inflated overall width. It is lightweight and quick to deploy and can be pulled very rapidly into the water, either from a container or boom reel and right from the beach. The average deployment time is 12 to 20 minutes for 200 metres, depending on the experience of the operators and the accessories included in the system

	My-Boom 600 AF	My-Boom 750 AF
Boom height, operational	600 mm (24")	750 mm (30")
Freeboard	250 mm (10")	310 mm (12")
Draught	350 mm (14")	450 mm (18")
Fabric weight	1000 g/sq.m (36 oz/sq.yd)	
Reinforcement fabric	Polyester 1100 dtex	
Fabric tensile strength	4000N/5cm width	
Colour	Orange	
Standard section length	15, 25 and 30 m - Air chamber length 4 m	
Air valve	Monsun XG non return valve	
End connectors	ASTM slide or ASTM quick with toggle pins	
Ballast chain	7 mm (3/16") hot galvanized	10 mm (3/8") hot galvanized
Boom Weight	3,0 kg/m	3.5 kg/m
Buoyancy to weight ratio	15:1	20:1
